Portfolio: https://gustavo-domingos.github.io/portifolio_pessoal

PROFESSIONAL SUMMARY

Backend Developer with over 2 years of experience on production systems. I currently support accounting automation systems at Ottimizza, and previously spent 2 years developing a proprietary ERP in Java and SQL Server at Lince Tech. I build REST APIs with Kotlin, Java, and Spring Boot, using relational databases (MySQL, SQL Server), Docker, and automated testing (JUnit 5, MockK, Testcontainers), and I also deliver front ends in React and TypeScript. Associate degree in Systems Analysis and Development from the Federal Institute of Santa Catarina (IFSC).

PROFESSIONAL EXPERIENCE

Junior Developer - Maintenance Team
Ottimizza Automação Contábil | 02/2026 - Present

- Fix bugs and support accounting automation systems in production, working from Jira and Salesforce requests.
- Refactor legacy code and reduce technical debt across back end and front end.
- Diagnose production issues by analyzing logs in Elastic.
- Run deploys and other tasks on AWS and maintain technical documentation.

Full-Stack Developer
Lince Tech | Blumenau, Brazil | 04/2023 - 04/2025

- Built and maintained features of a proprietary ERP in Java (XSeed framework), from the back end to screens in HTML, CSS, JavaScript, and jQuery.
- Optimized SQL Server queries and routines to keep the system stable and fast.
- Automated data-checking routines, reducing manual work and operational errors.
- Built dashboards and statistical reports to track the ERP's KPIs.
- Worked in an agile team (Scrum and Kanban) with Git and GitHub version control.

PROJECTS

Routes & Pickups - pickup and trip management system for a freight company (being rolled out)
REST API in Kotlin and Spring Boot with Exposed and MySQL; front end in React and TypeScript. NF-e invoice (XML) import from email via IMAP, customer portal, phone-first driver area with photos and GPS, multi-tenant data isolation, JWT authentication, and AES-GCM encrypted credentials.

Complementary Hours - calculation and review system for complementary activities at a school (being rolled out)
Kotlin, Spring Boot, Exposed, Flyway, and MySQL; front end in React. 16 business rules documented from the regulation, calculation engine with 100% test coverage enforced by the build (JaCoCo), integration tests with Testcontainers, role-based access control, and data privacy (LGPD) safeguards.

Quem eu voto - open source election transparency platform: github.com/gustavo-domingos/quem-eu-voto
Go API integrating open government data (electoral court, Congress, comptroller); front end in React. In-memory indexes with disk cache, multi-gigabyte files read through HTTP Range requests, layered architecture enforced by tests, Docker, and CI with GitHub Actions.

CRM Delice - capstone project, built as a team
CRM with Kotlin, Spring Boot, Exposed, JWT, and Docker, a Zoho integration, and a React and TypeScript front end. Responsible for the dashboard (endpoints and screens), filters, campaign creation, menu module, and standardized exception handling.

TECHNICAL SKILLS

Languages: Java, Kotlin, SQL, Go, TypeScript, JavaScript.

Back end: Spring Boot, Spring Security, Spring Data JPA, REST APIs, JWT, Exposed, Flyway, third-party API integrations.

Databases: SQL Server, MySQL, PostgreSQL, relational modeling, and query optimization.

Testing: unit and integration testing, JUnit 5, MockK, Testcontainers, Vitest.

DevOps and cloud: Docker, Docker Compose, AWS, CI/CD with GitHub Actions, Git, GitHub.

Front end: React, TypeScript, Vite, HTML, CSS, jQuery, Material UI.

Tools and methods: Elastic (logs), Jira, Salesforce, Power Automate, Scrum, Kanban, layered architecture.

EDUCATION

Associate Degree in Systems Analysis and Development - Federal Institute of Santa Catarina (IFSC), Gaspar - Completed
IT Technician, integrated with high school - Federal Institute of Santa Catarina (IFSC), Gaspar - Completed
Java Spring Developer (complementary course) - +Dev2Blu, Blumenau - Completed
